PagerDuty

905 King Street West, Suite 600

Toronto, ON, M6K3G9

Dear Hiring Manager:

I am writing to apply to the Anderson Developer Internship position that is available on both WaterlooWorks. After reading about PagerDuty, I free excited about contribute to an incident management system that improved agile development process, which I think is very efficient. I am a self-motivated developer with over a year of experience in building Native Android apps, as well as 4 months of work experience as a QA engineer in mobile application development. With my technical knowledge and a detail-oriented personality, I believe that I can bring significant value to your team.

From things like using Git to organize my resumes, to making a currency conversion app because I got tired of looking up currency rates as an international student who travels often. I learn new technologies fast and I enjoy it a lot. Not only does that bring convenience into my life, but it also makes the lives of others around me easier. Some examples would be the volleyball scoreboard application I made for community pickup games and the full-stack electronic job ticket system that I am currently building for my parent's industrial manufacturing company.

Not only am I comfortable with Scrum development flow using tools like Jira and Confluence, but I am also skilled in using various Android-related libraries like Retrofit, Room, Hilt, and Espresso as a testing framework. In addition, I have a solid understanding of object-oriented architecture like MVVM and dependency injection, ensuring a fast transition for me to become a part of your team.

Throughout my academic and tech career, I have learned to never be afraid of asking meaningful questions, as well as finding, raising, and solving existing problems. My extracurricular activities such as volleyball and volunteering truly made me a leader, a team player, and a confident speaker.

I am a person who takes pride in what I do, and I would love the opportunity to share more with you in an interview, also learn more about this or any other software development internships available under PagerDuty. Thank you for your time and consideration, I look forward to hearing more from you.

Sincerely,
Anderson Hsieh
